

# ART. K900

## SOLID CONTROL HANDWHEEL FOR BUILT-IN POSITION INDICATOR

### MATERIAL:

Reinforced and stabilised polyamide.  
Oils and greases resistant.

### SURFACE:

Satin.

### HANDWHEEL COLOUR:

Black (RAL 9011).

### ATTACHABLE POSITION INDICATOR:

SIKO gravity indicator type "S" or "SZ". The indicator can only be used in a vertical position (horizontal machine axle). The indicator and the d7 grub screw must be purchased separately. For further details see page 12.

(\*) SIKO position indicator S50/1 can be mounted with adapter KS80-50.

(+) SIKO position indicator S80/1 can be mounted with adapter KS120-80.

### MAIN INSERT:

Zinc plated steel right through bored bush with H7 tolerance.

For fixing systems, or execution of tabs or square holes, please refer to the technical notes attached to the catalogue.

### SPECIAL REQUESTS:

- It is possible to supply the inserts with d1 diameter by customer design, on request and for quantities.
- It is possible to supply the inserts in different materials, on request and for quantities.
- It is possible to supply the inserts with different treatment-finishes, on request and for quantities.
- On request and for special quantities the indicator seat can be changed.
- It is possible to supply the complete handwheel with colours as shown in the table at page 15, on request and for quantities.

## SOLID CONTROL HANDWHEEL FOR BUILT-IN POSITION INDICATOR WITH REVOLVING HANDLE

### MATERIAL:

Reinforced and stabilised polyamide.  
Oils and greases resistant.

### SURFACE:

Satin.

### HANDWHEEL AND HANDLE COLOUR:

Black (RAL 9011).

### ATTACHABLE POSITION INDICATOR:

SIKO gravity indicator type "S" or "SZ". The indicator can only be used in a vertical position (horizontal machine axle). The indicator and the d7 grub screw must be purchased separately. For further details see page 12.

(\*) SIKO position indicator S50/1 can be mounted with adapter KS80-50.

(+) SIKO position indicator S80/1 can be mounted with adapter KS120-80.

### MAIN INSERT:

Zinc plated steel right through bored bush with H7 tolerance.

### SIDE INSERT:

Brass right through threaded bush.

### SIDE HANDLE:

Revolving handle Art. M144  
(see chapter M on page 6).

For fixing systems, or execution of tabs or square holes, please refer to the technical notes attached to the catalogue.

### SPECIAL REQUESTS:

- It is possible to supply the inserts with d1 diameter by customer design, on request and for quantities.
- It is possible to supply the inserts in different materials, on request and for quantities.
- It is possible to supply the inserts with different treatment-finishes, on request and for quantities.
- On request and for special quantities the indicator seat can be changed.
- It is possible to supply the complete handwheel with colours as shown in the table at page 15, on request and for quantities.

# ART. K901

## SOLID CONTROL HANDWHEEL FOR BUILT-IN POSITION INDICATOR AND LOCKING HANDWHEEL

### MATERIAL:

Reinforced and stabilised polyamide.  
Oils and greases resistant.

### SURFACE:

Satin.

### HANDWHEEL COLOUR:

Black (RAL 9011).

### ATTACHABLE POSITION INDICATOR:

SIKO gravity indicator type "S" or "SZ". The indicator can only be used in a vertical position (horizontal machine axle). The indicator and the d7 grub screw must be purchased separately. For further details see page 12.

(\*) SIKO position indicator S50/1 can be mounted with adapter KS80-50.

(+) SIKO position indicator S80/1 can be mounted with adapter KS120-80.

### MAIN INSERT:

Zinc plated steel right through bored bush with H7 tolerance.

### LOCKING HANDWHEEL:

Cylindrical handwheel G793-36 with threaded stud (see chapter G page 12). Black (RAL 9011).

**Caution:** the Q2 dimension of the handwheel must be chosen by the customer according to the dimensions of the machinery on which it will be installed. For model K901-130 the locking handwheel is replaced with the wingnut L751-32 (see chapter L page 10).

For fixing systems, or execution of tabs or square holes, please refer to the technical notes attached to the catalogue.

### SPECIAL REQUESTS:

- It is possible to supply the inserts with d1 diameter by customer design, on request and for quantities.
- It is possible to supply the inserts in different materials, on request and for quantities.
- It is possible to supply the inserts with different treatment-finishes, on request and for quantities.
- On request and for special quantities the indicator seat can be changed.
- It is possible to supply the complete handwheel with colours as shown in the table at page 15, on request and for quantities.

## SOLID CONTROL HANDWHEEL FOR BUILT-IN POSITION INDICATOR WITH REVOLVING, FOLDING HANDLE

### MATERIAL:

Reinforced and stabilised polyamide.  
Oils and greases resistant.

### SURFACE:

Satin.

### HANDWHEEL AND HANDLE COLOUR:

Black (RAL 9011).

### ATTACHABLE POSITION INDICATOR:

SIKO gravity indicator type "S" or "SZ". The indicator can only be used in a vertical position (horizontal machine axle). The indicator and the d7 grub screw must be purchased separately. For further details see page 12.

(\*) SIKO position indicator S50/1 can be mounted with adapter KS80-50.

(+) SIKO position indicator S80/1 can be mounted with adapter KS120-80.

### MAIN INSERT:

Zinc plated steel right through bored bush with H7 tolerance.

### SIDE INSERT:

Brass right through threaded bush.

### SIDE HANDLE:

Revolving handle and folding Art. M136 (see chapter M on page 10).

For fixing systems, or execution of tabs or square holes, please refer to the technical notes attached to the catalogue.

### SPECIAL REQUESTS:

- It is possible to supply the inserts with d1 diameter by customer design, on request and for quantities.
- It is possible to supply the inserts in different materials, on request and for quantities.
- It is possible to supply the inserts with different treatment-finishes, on request and for quantities.
- On request and for special quantities the indicator seat can be changed.
- It is possible to supply the complete handwheel with colours as shown in the table at page 15, on request and for quantities.

It's possible to increase the hole, by boring, until dm.

Next to the d5 diameter is shown a mountable Siko indicator. For information on the indicator visit the SIKO web site at [www.siko.de](http://www.siko.de).

# ART. K905

## SOLID CONTROL HANDWHEEL FOR BUILT-IN POSITION INDICATOR WITH REVOLVING, FOLDING HANDLE AND LOCKING HANDWHEEL

### MATERIAL:

Reinforced and stabilised polyamide.  
Oils and greases resistant.

### SURFACE:

Satin.

### HANDWHEEL AND HANDLE COLOUR:

Black (RAL 9011).

### ATTACHABLE POSITION INDICATOR:

SIKO gravity indicator type "S" or "SZ". The indicator can only be used in a vertical position (horizontal machine axle). The indicator and the d7 grub screw must be purchased separately. For further details see page 12.

(\*) SIKO position indicator S50/1 can be mounted with adapter KS80-50.

(+) SIKO position indicator S80/1 can be mounted with adapter KS120-80.

### MAIN INSERT:

Zinc plated steel right through bored bush with H7 tolerance.

### SIDE INSERT:

Brass right through threaded bush.

### SIDE HANDLE:

Revolving handle and folding Art. M136 (see chapter M on page 10).

### LOCKING HANDWHEEL:

Cylindrical handwheel G793-36 with threaded stud (see chapter G page 12). Black (RAL 9011).

**Caution:** the Q2 dimension of the handwheel must be chosen by the customer according to the dimensions of the machinery on which it will be installed. For model K905-130 the locking handwheel is replaced with the wingnut L751-32 (see chapter L page 10).

For fixing systems, or execution of tabs or square holes, please refer to the technical notes attached to the catalogue.

### SPECIAL REQUESTS:

- It is possible to supply the inserts with d1 diameter by customer design, on request and for quantities.
- It is possible to supply the inserts in different materials, on request and for quantities.
- It is possible to supply the inserts with different treatment-finishes, on request and for quantities.
- On request and for special quantities the indicator seat can be changed.
- It is possible to supply the complete handwheel with colours as shown in the table at page 15, on request and for quantities.

## ADAPTER FOR POSITION INDICATOR SEAT

**MATERIAL:**

Reinforced and stabilised polyamide.  
Oils and greases resistant.

**SURFACE:**

Satin.

**COLOUR:**

Black (RAL 9011).

**ALTERNATIVE ADAPTOR COLOUR:**

Orange (RAL 2004 cod. 02).

Blue (RAL 5015 cod. 07).

Yellow (RAL 1021 cod.10).

Red (RAL 3000 cod.16).

Green (RAL 6024 cod.17).

Grey (RAL 7035 cod. 13).

**Caution:** Grub screw for indicator not supplied.

**SPECIAL REQUESTS:**

- It is possible to supply colours as shown in the table at page 15, on request and for quantities.

## INDICATOR SEAT CLOSING COVERS

**MATERIAL:**

Reinforced and stabilised polyamide.  
Oils and greases resistant.

**SURFACE:**

Satin.

**PRIMARY COVER COLOUR:**

Black (RAL 9011).

**SECONDARY COVER COLOUR:**

Grey (RAL 7035 cod. 13).

**ALTERNATIVE CAP COLOUR:**

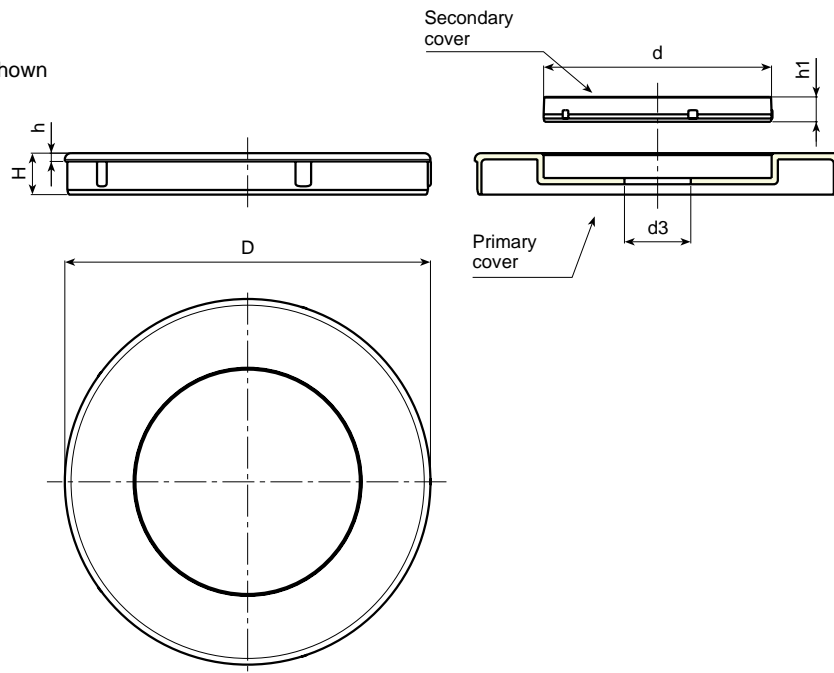

Orange (RAL 2004 cod. 02).  
Blue (RAL 5015 cod. 07).  
Yellow (RAL 1021 cod.10).  
Red (RAL 3000 cod.16).  
Green (RAL 6024 cod.17).  
Black (RAL 9011 cod. 01).

**COVER FIXING METHOD:**

Self push-fit. Removable.

**SPECIAL REQUESTS:**

- It is possible to supply colours as shown in the table at page 15, on request and for quantities.

**PAD PRINTING SERVICE:**

- Upon request and for special quantities caps can be supplied with customized pad printing.

# INDICATORS

BOTECO handwheels with SIKO position indicators are used in the most varied industrial applications. The reliable, precise operating principle of these instruments make them suitable for use in printing machines, in the food industry, as well as in the standard applications of the sheet metal and wood industries. They are robust enough to guarantee maximum durability even in the toughest working environments. The sturdy operating principle of the position indicators combined with tangible ergonomics make the BOTECO +SIKO handwheels extremely reliable.

The operating principle of the position indicators is based on the physical law of gravity. The suspension design in the housing makes it possible to have a double bearing-supported pointer shaft that is formed as a suspension axle for a freely swinging weight. The scale, the gearbox with the required gear ratio and the pointer bushing orient themselves to the weight alignment. When the handwheel is turned, the gear that is attached to the pointer shaft transmits the

turning motion to the suspended swinging reduction gear box, in the ratio of 1:x. The direct connection between the handwheel and the bearing-supported gearbox makes it possible to obtain 100% accurate values.

Handwheels used on horizontal spindles have a reliable, maintenance-free construction. They make it possible to achieve accurate adjustment and reading of even the finest rotational settings, independent of the pitch of the spindle to be measured.

**Information to be given when placing an order or requesting a quotation**

In order to choose the most suitable indicator the following information must be provided when placing an order or requesting a quotation:

- d1:** Diameter of the handwheel bore, where it is joined to the shaft.
- P:** Pitch of the shaft where the handwheel with indicator is joined to it. The pitch is the distance the shaft moves with one revolution of the handwheel.
- Direction:** Rotation of the pointers, clockwise or counterclockwise.
- d5:** Diameter of the indicator to be used.
- Configuration:** N – Dust-tight configuration (standard).  
P – Filled with paraffin oil. Absorbs vibrations and shock. Condensation-free.  
W – Water-tight.

**Scale and accuracy of the indication.** As these are the most important data, their selection must be made very carefully.

Each scale and each divisioning for the position indicator must satisfy various requirements. The basis for the indicated values is always formed by the selected gear ratio. This defines the distance that should be travelled for a certain number of revolutions. The S-type position indicator can be configured with two pointers where one pointer is always moved with a gear ratio. With only one pointer and an assumed gear ratio of 20, a geared pointer moves through a scale range of 360° for 20 handwheel revolutions, that is, the complete adjustment distance must be within only one revolution of this pointer. With the selection of a

second pointer, it moves 1:1 with the actual movement of the handwheel.

The SZ-type position indicator is designed for large measuring distances. In this model, the geared pointer of the S-type is replaced with a digital counter. This makes it possible to display more than one revolution of the reduced pointer. This combination has proven to be particularly useful in applications which require a large number of revolutions and precise position information.

Naturally, the standard scales cannot satisfy all needs. Therefore, SIKO provides special scales constructed according to customer requirements, such as for example, to indicate adjustments in both directions that start from a zero value and require a scale with increasing and decreasing values. For the fabrication of such scales, precise information in the form of sketches or technical drawings must be provided by the customer. We will also gladly comply with special customer requirements such as for example division marks, numbers, company logos or special colours.
